

The Guest-In-Room™ Detector

.....A Feature of GEM System®.....

- **Save Time • Save Money • Improve Staff Efficiency**
- **STOP Needlessly Disturbing Your Guests**

Lodging Technology's **Guest-In-Room™ Detector** (GRD) allows authorized housekeeping, minibar, maintenance, security, and management personnel to determine whether a person is actually present inside a guestroom--without knocking on the door and waiting for a response--without disturbing your guests--and without allowing unauthorized personnel access to this information.

GEM System® transmits an *invisible coded signal* at a guestroom's entry door. Your authorized staff member is provided with a small, hand-held GRD Scanner.

To determine actual in-room occupancy, the Scanner is pointed at the door frame. If a person is *not present* inside the room, a GREEN light illuminates on the Scanner. If a person *is present*, a RED light illuminates. Accurate, real-time information about the presence of a guest is immediately displayed.

The Guest-In-Room™ Detector eliminates unwanted, embarrassing intrusions upon the guest while asleep, dressing, or in the shower.

The GEM System® Guest-In-Room™ Detector:

- Allows Housekeepers to quietly, efficiently clean empty rooms when guests have left for breakfast, without disturbing other guests.....
- Allows Maintenance to service the HVAC unit without needlessly disturbing guests.....
- Allows Minibar service personnel to restock without inadvertently disturbing guests.....
- Allows Management to check for unauthorized "stayovers".....
- Prevents Turn-Down service personnel from disturbing guests who are in bed.....
- Detects rooms which are actually "vacant" when guests have left the "Do Not Disturb" sign on the door.....
- Allows Security personnel to check unrented rooms without alerting intruders.....
- Facilitates quick evacuation of the hotel in case of emergency.....
- Allows Housekeepers to be more sensitive to "hearing impaired" guests as they enter rooms.....
- Provides an increased level of personal safety for your employees.....

We're More 'Sensitive' To Your Guests.
